As good as it was at the time of release, this game has not aged well, I'd go with their newer products.. Definitely what I was hoping for!

It's got enough variety where, if you get a bit creative with the Rate you play them, you can use these for a wide variety of genres! Lots of sound and music files. I got it on a 30% sale, and honestly I think paying full price would probably still be worth it, especially if you work with this program a lot.

It's unfortunate it can't be legally used with RPG Maker unless you own the RPG Maker rites to these songs, but, fromt what I understand, this does grant a commercial lisenca for Visual Novel Maker -- meaning, if I'm correct, you can sell VN Maker games that contain this music. Definitely look into it to confirm.

Which, yeah, that's all I needed!

9.5V10! Really beautiful music! It's gonna be awesome to use!. Mac users, DO NOT PURCHASE

Kind of upset there's been no word about the release of the DLC for Mac users. All info on the main game page pretty clearly indicates that the game + all DLC would be available on both PC & Mac. I purchased a Season Pass, and am now in the daunting process of trying to get my money back. I have received no word back from Steam or Feral customer support after reaching out days ago. Been a longtime fan of the games. This is a big bummer.. Great value. \$5.69 CDN V 68 asset = 8 cent per asset!!!

or 4.99 USD V 68 asset = 7 cent per asset!!!!

Thank you KingLeno.

. Loving this game so far. I'm set at max graphics, it's running smooth as silk, and I absolutely love all the new graphical effects. The lighting and shaders on the ships are stellar. Especially loving being able to use the open mic to play songs off of youtube, but it doesn't always succeed. I had all the achievements in the original game before the DLC came out and added more, but this game still feels fresh even after playing the old one. The gameplay itself is nearly the same as the original, but if it aint broke don't fix it I say, more than fresh enough to justify a buy, even if you own the first.. It makes an already great game even better, the name speaks for itself. Highly reccomend for any desk slammers Pog. The game starts to get hard after the 3rd episode. Specially the last 4 games in each section. The achievements are very high. Not much can be done except "Campaign" (Maybe it is for me.)

In the "Word" game there are only two languages: english and turkish. It's okay for me, because my native language is turkish :) "Math" game is usefull for your child. Still, not for the very young. Already after a couple of equations it is getting harder.

In the meantime, the target for the "Classic" game is set to 0. I don't think this can be done. I made a maximum of 1. The graphic is avarage, no music.. So, I would recommend it if you like difficult puzzles and snake games.. Sadly, this is an example of Downloadable Content that lost a lot of opportunities to correct the flaws of ArcaniA.

I bought the DLC in a package and finished the Story.

Instead of playing it, if you want to know the finale, just search YouTube and watch it.

Play ArcaniA only!. This is the best Pre-Production Plan Tool , If you are looking down the line plan for games and movies, this is the boss! it lives as it says, very efficient way to work, brain storm, execute , a time saver ! Very Handy for teams or if you are using for indie

Money run.... before we get into this like many other reviews i have been playing this when it was a browser game when i was around 10-12 when making accounts was free and then another company bought the rights to the game and i lost all my progress i got like 4-5 skins then lost it coz of the stupid verification steps and 12 year old me did not understand it and gave up it was fun while it lasted, anyway i bought on steam and i was like this should be a good one, i was correct it was a good game but i wasn't having as much fun as i thought i would have so i refunded but if you're like 10 or so and dont like fortnite but want some cartoon type FPS game like 12 year old me then this game is perfect 10/10

if you're a teen and like real FPS better off getting a gaming PC and getting Battlefield and COD.. itsz garbage to hard to get money not enough time :(This is the software God uses to make galaxies. Play in room scale so you can throw the star matter to form your own nebulae. Balance them on the end of your controller and maneuver them to your mouth and eat them. All the while listening to your favorite psychedelic music. Pink Floyd's "Wish You Were Here" works just perfect. Gotta try The Grateful Dead's "American Beauty" next. An essential Vive experience.. Fun, solid strategy. Great for quick plays. Great clean pixel art and sound. Tons of replayability.. It's cute, and short enough that it only slightly tries an adult's patience. Great game to play with your child. That is seriously one cracked out looking kitten, though.. You play as Jane, who hunts Others with her adopted brother Jace. Jace was cursed by one of the Others, which are sort of witches. Others have been plaguing mankind for some time. You have managed to track down the Other who cursed Jace so long ago. But she is also hunting you\u2026

The plot is thrilling, the minigames entertaining, and the HO scenes are fun. Worth the price.. Obscenely difficult, responsive, and clever as all heck. Also there's hot animes.
